[Hedge](#)

FX hedging is a common tool used by multinational corporates to minimize or eliminate foreign exchange risk. Many of our clients settle hedges through the [netting](#). The system allows [participant](#) to participant hedging, the more common participant to Treasury hedging if [payables](#) or [receivables](#) and usually Treasury will hedge the position of the group or back to back hedge between Treasury and a bank.

[Hosting](#)

the system supplier provide an environment for the customer to run the software. Usually the client has purchased the software but given it to the vendor to host on their hardware.
