

# Payable Driven or Receivable Driven MULTILATERAL Netting

The Coprocess multilateral netting solution allows for 3 different ways to run the netting. Because no two corporates are the same or have the same requirements for netting it is important to be able to offer these choices in the method of running multilateral netting. The 3 different methods have fundamental differences in what is settled and when.

The pie chart below shows which methods is used by our 175 customers:

For more information on the specific of the different methods and their benefits and drawbacks please click on the buttons below.
